Frequently asked questions for Independent Disinfectant testing

Further Information

Further information about independent testing services can be found at the following hyperlink
http://www.pirbright.ac.uk/Services/disinfectantTesting.aspx?ID=1

Submission form

The submission form is available at the above link. On submission of the form to disinfectant.testing@iah.ac.uk, we will request an invoice to be forwarded to you from our Finance department.

Fees

The current fee for each test submission is £2,350.00 (plus VAT when applicable). This fee is applicable to standard test conditions and provides a result using five replicates at one dilution. When further dilutions are required for our range finder service, the cost of the test will increase by £100.00 per additional dilution requested. Therefore, if five dilutions are requested, the full cost of the test will be £2,750.00 (plus VAT where applicable).

Hard copies of disinfectant reports will be sent by courier to regions where we have experienced persistent problems with air mail services. These regions include South Korea. The additional costs for this courier service will be £35.00 per disinfectant submission.

Test results will not be released until full payment has been received.

MSDS

A safety data sheet must be sent either by email or with the product.

Sample Submission

The amount of sample we require for a disinfectant is normally between 100 to 200 grammes or mls.

Dispatch of the sample is the responsibility of the customer and should be sent in accordance with local and international transport regulations. This will vary according to the nature of the product.

Turnaround Time for Testing

The current turnaround time is approximately three months. This time frame is from receipt of all paperwork and samples.
